USING THE DIRECTORY

The West Alabama Regional Commission has compiled this directory to promote trade among firms within the seven-county region and to serve as a resource for economic developers, local governments, and regional commission staff in their economic development efforts.

This directory includes only companies with five or more employees classified by the North American Industry Classification System as Mining (2017 NAICS Codes 211120 - 213115) or Manufacturing (2017 NAICS Codes 311111 - 339999). Companies may have multiple NAICS codes to reflect their various products and services. We have attempted to list companies by their primary classification. Sources used to collect data include local industries, municipal and county governing bodies, chambers of commerce, industrial development boards/authorities, information software, and online searches. Staff attempted to contact each company to collect or review data; however, some information was either unavailable or could not be released.

Each county section begins with a map showing the county seat, municipalities, transportation features, and the names and locations of the top five mining/manufacturing employers in that county. An alphabetical listing of the companies operating in that county follows with details about the business including raw materials (RM) used and finished products (P) made by the company. The final section provides a reference table of the current 2017 NAICS codes and descriptions.

If your business or industry needs assistance, would like to be listed in the directory, or wishes to provide updated information on a company listing, please contact us. We are happy to assist you.
