Semiannual Ozone Report

I. Ozone Overview

Ozone information:

- Ground level ozone - not stratospheric ozone
- Colorless gas formed on dry, sunny, hot, stagnant days (March – October)
- Primarily a problem in and near metropolitan areas
- Not directly emitted
- Pollutants, which form ozone, come from many sources

Current Ozone Standards:

The National Ambient Air Quality Standards (NAAQS) for ozone are 0.070 parts per million of ozone.

II. Recent ozone measurements for Tuscaloosa

Fourth-highest daily maximum 8-hour average ozone concentrations:

2016 – 0.061 ppm
2017 – 0.057 ppm
2018 – 0.063 ppm
Three-year average – 0.060 ppm

III. Current ozone measurements for Tuscaloosa

Ozone season:

- March 1st – October 31st
- Current fourth-highest daily maximum 8-hour average ozone concentrations are 0.060 ppm. Data through October 31st, 2019
- The measured values have not been through all quality assurance checks

IV. Future changes to ozone standards

Fourth-highest daily maximum 8-hour average ozone concentrations:

(Provisional)

2017 – 0.057 ppm
2018 – 0.063 ppm
2019 – 0.060 ppm
Three-year average – 0.060 ppm

Annual Greenhouse Gas Report

I. Greenhouse Gas Overview

At the global scale, the key greenhouse gases emitted by human activities are:

- **Carbon dioxide (CO₂):** Fossil fuel use is the primary source of CO₂.
- **Methane (CH₄):** Agricultural activities, waste management, energy use, and biomass burning all contribute to CH₄ emissions.
- **Nitrous oxide (N₂O):** Agricultural activities, such as fertilizer use, are the primary source of N₂O emissions. Biomass burning also generates N₂O.
- **Fluorinated gases (F-gases):** Industrial processes, refrigeration, and the use of a variety of consumer products contribute to emissions of F-gases, which include hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF₆).

Global greenhouse gas emissions broken down by economic activities:

- **Electricity and Heat Production** (25% of 2010 global greenhouse gas emissions)
- **Industry** (21% of 2010 global greenhouse gas emissions)
- **Agriculture, Forestry, and Other Land Use** (24% of 2010 global greenhouse gas emissions)
- **Transportation** (14% of 2010 global greenhouse gas emissions)
- **Buildings** (6% of 2010 global greenhouse gas emissions)
- **Other Energy** (10% of 2010 global greenhouse gas emissions)

II. Greenhouse Gas Updates

- **February 2019: NASA's Carbon Monitoring System (CMS) funded:** CMS combines observations of sources and sinks into high-resolution models of the planet's flows of carbon.
- **November 2019: U.S. formally notified the United Nations that it would withdraw the United States from the Paris Agreement on climate change:** Begins a yearlong countdown to the United States exit.

Transportation Systems Management and Operations (TSMO) December 2019

1. Updates of Current Projects

- McFarland Boulevard project (south of Skyland Boulevard East to Rose Boulevard)
- ALDOT Regional traffic management center
- Lurleen Wallace Boulevard Downtown Tuscaloosa
- 5th Street at Lurleen Wallace Boulevard (Northport)
- Fiber optic network expansion - US DOT Grant
- I-20/59 at US-11, Exit 79
- US-11 at Holley Springs Lane in Fosters
- ALDOT and City of Tuscaloosa TSMO Agreement

2. Proposed or New Projects

- Access Management
- Operation Management (signal coordination, signal phasing, driver information, incident management, data management, and security)
- Demand Management (decrease demand, shift demand to non-automobile modes, and adjust demand times)
- Complete Streets

Balance Sheet for the Surface Transportation Attributable Funding Category In Total Funds (80% Federal and 20% Local)

* This table includes additional costs that, in some cases, have not been incorporated into the ALDOT project management system.

Proposed TIP Amendments - December 2019

1. **(Cost Increase)** 100068755 US-11 (SR-7) from Daimler Benz Boulevard to SR-5 - Add lanes; RW; 12/1/2019; Old estimate: \$6,120,600; New estimate \$8,814,500
2. **(Addition)** 1000 Tuscaloosa County Parking and Transit Authority Section 5339 Bus and Bus Facilities Program - Capital FY 2019 (7 Replacement Buses); TR; 2/1/2020; \$2,375,000

PM1 - Safety Performance Targets for Fiscal Year 2020

Taken from the ALDOT 2018 Alabama Highway Safety Improvement Program

Number of Fatalities: 964

This performance target was developed through a trend line analysis of the five-year moving average for fatalities, Alabama unemployment rate trend, and Alabama Gross Domestic Product (GDP) trend. This analysis determined the fatality trend line plus a 1.7% increase associated with GDP correlated with the currently observed trends of fatal, serious injury, and non-motorized crashes. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term fatality trends.

Number of Serious Injuries: 8,143

This performance target was developed through a trend line analysis of the five-year moving average for serious injuries, Alabama unemployment rate trend, and Alabama Gross Domestic Product (GDP) trend. This analysis determined the fatality trend line plus a 1.7% increase associated with GDP correlated with the currently observed trends of fatal, serious injury, and non-motorized crashes. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term serious injury trends.

Fatality Rate: 1.35

This performance target was developed using the fatality trend line plus a 1.7% increase associated with GDP and an estimated vehicle miles traveled (VMT) growth of 1%. The target represents the projected fatalities as a ratio to 100 million VMT. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term fatality rate trends. This performance target was developed through a trend line analysis of the five-year moving average for serious injuries, Alabama unemployment rate trend, and Alabama Gross Domestic Product (GDP) trend. This analysis determined the fatality trend line plus a 1.7% increase associated with GDP correlated with the currently observed trends of fatal, serious injury, and non-motorized crashes. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term serious injury trends.

Serious Injury Rate: 11.08

This performance target was developed using the serious injuries trend line plus a 1.7% increase associated with GDP and an estimated vehicle miles traveled (VMT) growth of 1%. The target represents the projected serious injuries as a ratio to 100 million VMT. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term serious injury rate trends.

Total Number of Non-Motorized Fatalities and Serious Injuries: 384

This performance target was developed through a trend line analysis of the five-year moving average for non-motorized fatalities and serious injuries, Alabama unemployment rate trend, and Alabama Gross Domestic Product (GDP) trend. This analysis determined the non-motorized fatalities and serious injuries trend line plus a 1.7% increase associated with GDP correlated with the currently observed trends of non-motorized fatalities and serious injuries. This target supports the SHSP by helping Alabama focus its strategy, or direction, and making decisions on allocating its resources to reduce long-term non-motorized fatalities and serious injuries trends.

Transit Asset Management Performance Targets for 2020

Taken from the Tuscaloosa County Parking and Transit Authority (TCPTA) Transit Asset Management Plan - 2019/2020 Update

TCPTA has set the performance targets under the SGR by January 1, 2020 as follows:

TCPTA Transit Asset Performance Measures – Tier II			
Asset Category	Performance Measures	Performance Targets	Comments
*Rolling Stock <i>All Revenue Vehicles</i>	Age - % of revenue vehicles within a particular asset class that have met or exceed their Useful Life Benchmark	Vans – reduce by 10% of current active inventory	Benchmarks have been set for each class of vehicle based on its current active inventory
		Cutaway Buses – reduce by 10% of current active inventory	
		Body-in-Chassis – reduce by 10% of current active inventory	
		Full Size Buses – reduce by 10% of current active inventory	

TCPTA has set a target to reduce vehicles that have exceeded their useful life by 12% each year. In order to meet this target, at least one bus and one van will be replaced each year. TCPTA also plans to replace at least one full size bus that has exceeded its useful life in 2019. At the end of 2019, TCPTA will evaluate whether or not the 12% reduction target has been met. If not, TCPTA will revisit the target to ensure that it is realistic and if so, TCPTA will revise methodologies to meet the target in future years.

ASSET CONDITION RATINGS: 1 = WORN, 2 = MARGINAL, 3 = FAIR, 4 = GOOD, 5 = EXCELLENT

TCPTA Transit Asset Performance Measures -- Tier II (Continued)			
Asset Category	Performance Measures	Performance Targets	Comments
Equipment <i>Non-revenue vehicles</i>	Age - % of non-revenue vehicles within a particular asset class that have met or exceed their Useful Life Benchmark	Overall reduction that current inventory by 10%	Equipment is defined as nonexpendable, tangible property, having a useful life of at least one year. TCPTA will inventory only FTA purchased equipment over \$25,000
Facilities <i>Intermodal Facility</i> 60123 rd Ave <i>Bus Maintenance Facility</i> 2450 Hargrove Rd E	Conditions -- % of facilities with a condition rating below 3.0 on an FTA Transit Economic Requirement Model (TERM) Scale	No more than 20% of FTA funder Facilities to have a rating of below 3.0 (Fair) Condition	TCPTA will only rate FTA funded facilities.

Draft

2020 Bicycle and Pedestrian Plan Recommendations

3.1 U.S. Department of Transportation (U.S. DOT) Bicycle and Pedestrian Policy

The MPO encourages the local governments and the Alabama Department of Transportation to follow the current U.S. DOT policy regarding bicycle and pedestrian facilities. The guidelines require bicyclists and pedestrians to be accommodated in the design of new and improved transportation facilities unless certain limited conditions are present.

Almost every transportation improvement is an opportunity to enhance the safety and convenience of walking and bicycling. Bicycle and pedestrian needs must be given "due consideration" under Federal surface transportation law (23 U.S.C. 217(g)(1)), and this should include, at a minimum, a presumption that bicyclists, pedestrians, and persons with disabilities will be accommodated in the design of new and improved transportation facilities. In the planning, design, and operation of transportation facilities, bicyclists, pedestrians, and persons with disabilities should be included as a matter of routine, and the decision to not accommodate them should be the exception rather than the rule.

Bicycle and pedestrian ways shall be established in new construction and reconstruction projects in all urbanized areas unless one or more of three conditions are met: (1) bicyclists and pedestrians are prohibited by law from using the roadway. In this instance, a greater effort may be necessary to accommodate bicyclists and pedestrians elsewhere within the right of way or within the same transportation corridor; (2) the cost of establishing bikeways or walkways would be excessively disproportionate to the need or probable use. Excessively disproportionate is defined as exceeding twenty percent of the cost of the larger transportation project; and (3) where sparsity of population or other factors indicate an absence of need. *United States Department of Transportation Policy Statement on Bicycle and Pedestrian Accommodation Regulations and Recommendations*, Signed on March 11, 2010 and announced March 15, 2010

3.2 Americans with Disabilities Act (ADA) Issues and Existing System Gaps

The MPO encourages the local governments and the Alabama Department of Transportation (ALDOT) to upgrade areas of the transportation network that do not meet current ADA standards and to add non-motorized facilities to close existing gaps in the transportation network. The local governments and ALDOT have prepared transition plans that identify ADA transportation issues and schedule the necessary work to bring the network into compliance with the current law. The MPO Bicycle and Pedestrian Committee identified gaps in the transportation network that when closed, will make bicycling and walking safer and more convenient. **The ADA issues and sidewalk gaps are mapped on Figure ___.** Areas around schools and bus stops, and routes that connect neighborhoods with shopping and employment centers should be given a high priority.

3.3 General Road Improvement Projects

The MPO encourages the local governments and the Alabama Department of Transportation (ALDOT) to add non-motorized improvements to all transportation projects, regardless of funding source. Unlike federally-funded projects, locally and state-funded projects do not require non-motorized transportation consideration. These types of improvement, generally, do not add substantial cost to a project. Adding the facilities as part of a larger project also minimizes disruptions. In the recent past, the City of Tuscaloosa has included pedestrian facilities, and sometimes bicycle elements, in their locally-funded transportation projects.

3.4 Stand-Alone Projects

The MPO encourages the local governments and the Alabama Department of Transportation (ALDOT) to build non-motorized transportation projects independent of other projects. The entities can use the un-funded section of this plan as a guide for selecting projects. The Bicycle and Pedestrian Committee utilized input from local groups and individuals, as well as reviews of current conditions to choose projects for that section. Possible funding sources include local governments, the University of Alabama, ALDOT, federal grants, and private grants.
